DEEPAK GARG

GENERATIVE AI / AI-ML DEVELOPER

Dhuri, Punjab, India | +91-8264271283 | dgarg5080@gmail.com | LinkedIn | Github

PROFESSIONAL SUMMARY

Aspiring Generative AI and AI/ML professional with a foundation in Python, machine learning, NLP, and data analysis, currently developing skills in Large Language Models (LLMs), LLM APIs, prompt engineering, embeddings, LangChain, RAG, vector databases, agentic AI, and AI application development. Hands-on experience with Python-based AI/ML projects involving data preprocessing, model development, classification, prediction, and deployment. Seeking opportunities as a Generative AI Developer, LLM Engineer, AI/ML Engineer, or Python AI Developer.

TECHNICAL SKILLS

Programming: Python, Object-Oriented Programming (OOP)

LLMs & Generative AI: Large Language Models (LLMs), LLM APIs, Chat, Embeddings, Roles, Function Calling, Safety, Prompt Engineering, Zero-Shot, Few-Shot, Prompt Templates, Hallucination Control, Retrieval Augmented Generation(RAG) , Langchain , LCEL(Langchain Expression Language)

Agentic AI: Understanding of Agentic AI concepts, including AI agents, tool calling, state management, and memory. Learning to build multi-agent workflows with task delegation and specialized agents using LangChain.

Retrieval Augmented Generation (RAG): Understanding of RAG Pipelines , includes document-loading , text -chunking , embeddings , vector store , similarity search and context response generation using LLMs.

LangChain: Hands on Experience with LangChain components for building LLM applications , including prompt templates , document loaders , text splitters , retrievers , output parsers , embeddings , vector stores and LCEL-based chains.

FastAPI: Learning FastAPI to develop REST APIs using Python and handle HTTP requests through endpoints. Practicing database integration with SQLite to retrieve and manage student records.

Framework & Libraries: FastAPI , Streamlit , Hugging Face

Tools & Collaboration: Git, GitHub, Slack

GENERATIVE AI TRAINING

NetSquare Softwares — Generative AI Training | July 2026 – December 2026

- Structured training in Generative AI, Large Language Models (LLMs), LLM APIs, prompt engineering, embeddings, LangChain, RAG, vector databases, agentic AI, AI evaluation, FastAPI, Streamlit, Gradio, deployment, and AI system design.
- Developing practical understanding of LLM applications, orchestration, retrieval-augmented generation, AI agents, reliability, and AI application development.

EXPERIENCE / INTERNSHIPS

ThinkNEXT Technologies Pvt. Ltd. — AI/ML Training | Mohali, Punjab | June 2025 – July 2025

- Completed 45-day Python and AI/ML training focused on Python programming, data analysis, data preprocessing, machine learning model development, and practical AI/ML applications.
- Worked with machine learning algorithms and real-world datasets, including preprocessing, model building, evaluation, and deployment concepts.

CGC University Jhanjeri — Python Internship/Training | June 2025 – July 2025

- Gained hands-on experience with Python, data preprocessing, and machine learning model development using real-world datasets.
- Used NumPy, Pandas, Matplotlib, and Scikit-learn for data processing, analysis, visualization, and machine learning workflows.

PROJECTS

Social Media Agent | Python | Generative AI | Streamlit | LLMs | APIs (Link)

- Developed an AI-powered social media analysis application with a Streamlit user interface.
- Implemented functionality to accept an Instagram profile URL and analyze available posts.
- Integrated AI-based analysis to generate insights from social media content.
- Built an interactive interface to make the analysis process accessible to users.

Resume AI Assistant using Retrieval Augmented Generation| Python | Langchain | FAISS | Streamlit | LLM APIs (Link)

- Developed a document-based question-answering application using Retrieval-Augmented Generation (RAG).
- Extracted text from PDF documents and divided it into smaller chunks for processing.
- Generated embeddings and stored document representations in a FAISS vector store.
- Implemented semantic similarity search to retrieve relevant information from uploaded documents.
- Integrated retrieved context with an LLM to generate relevant, context-aware responses through a Streamlit interface.

EDUCATION

Bachelor of Computer Applications (BCA) CGC University, Jhanjeri, Punjab | 2023 – 2026 | CGPA: 7.49

Class XII — PSEB Robin Model Senior Secondary School, Dhuri | 2022 – 2023 | 83%

Class X — PSEB Robin Model Senior Secondary School, Dhuri | 2021 – 2022 | 89%

CERTIFICATIONS

- Python AI&ML Training — ThinkNEXT Technologies Pvt.Ltd.Mohali (45 Days)
- 30-Day Coding Marathon — CGC University Jhanjeri
- Generative AI Training — NetSquareSoftwares, Mohali (6 Months)
